Re: Richard Bersohn Festschrift

Dear Neil

I would be delighted to contribute to a special issue of the Journal of Physical Chemistry devoted to a Richard Bersohn Festschrift. I very much hope that we can write an article about our bimolecular reaction dynamics studies using photon-initiation. As you well know, Professor Bersohn has made very important contributions in this area, which particularly inspired us when we started out in this field some ten years ago.

Yours sincerely

Mark Brouard
