Neil Shafer-Ray
Associate Professor of Physics
The University of Oklahoma
Norman, OK 73019

Dear Neil:

I am delighted to signify my intent to contribute to the Festschrift honoring Professor Richard Bersohn. Rich and his work have had a profound influence on my own career, and he is certainly a major figure in chemical physics of our generation. You may also know that he was (once long ago) a member of the department here at Cornell, and also that he and I co-taught a kinetics course at Columbia one semester while I was on leave.

I look forward to an exciting issue of the Journal. My contribution will be in the general area of photodissociation dynamics.

With best wishes,

Sincerely,

Paul L. Houston
