Prof. Mostafa El-Sayed
Editor
The Journal of Physical Chemistry

Dear Prof. El-Sayed:

As informed by Prof. Neil Shafer-Ray of The University of Oklahoma, I am very much interested in submitting a manuscript for Festschrift for Prof. Richard Bersohn of Columbia University. He has been a pioneer in the field of photodissociation dynamics. As far as I understand, the very first experiment on the photodissociation dynamics was performed in his lab. After his original idea and experiment, this field has grown up and now it is one of the major subjects in physical chemistry. I feel it would be my honor to contribute a paper to this special issue of The Journal of Physical Chemistry in the field of photodissociation.

Sincerely yours,

Masahiro Kawasaki

Professor of Physical Chemistry,
Department of Molecular Engineering,
Kyoto University
and
Professor of Atmospheric Sciences,
Graduate School of Global Environmental Studies,
Kyoto University
