Dear Professor El-Sayed,

This is a letter to echo a special JPC Festschrift dedicated to Professor Richard Bersohn initiated by Professor Neil Shafer-Ray.

In light of Rich's contribution to the field of chemical dynamics throughout his career, I believe a special issue to honor him at his retirement is most appropriate. He is a great scholar, a respected mentor, and a scientist I admire the most. I also believe that many people in the field feel the same and we all would like to make a contribution at this special occasion.

Happy Chinese New Year- a Year of Sheep!

Best regards,
Kopin
