

February 9, 2003

Dear Mostafa:

Via this e-mail, I am expressing my interest and willingness to submit a paper for Prof. Bersohn's Festschrift. The paper will be on the photodissociation of an atmospherically important molecule. I have always admired Prof. Bersohn's work, especially in photodissociation studies, and it will be my privilege to submit a letter to honor his many years of contributions and many major new ideas.  
All the best  
Ravi
