Professor Neil Shafer-Ray
Department of Physics and Astronomy
The University of Oklahoma
440 West Brooks Street
Norman OK, 73019
USA

Dear Neil

It is my pleasure to join in the preparation of a Journal of Physical Chemistry Festschrift in honor of Richard Bersohn. Richard Bersohn has been and still is a shining light to me and many other Physical Chemists as a great scientist and a wonderful human being. I can think of no one alive today who is more deserving of this honor. I wholeheartedly support this effort and will contribute an original paper to this issue.

Sincerely yours,

Moshe Shapiro

The Jacques Mimran Professor of Chemical Physics,
The Weizmann Institute of Science, Rehovot, Israel
and
Canada Research Chair Professor,
The University of British Columbia, Vancouver, Canada
