The Journal of Physical Chemistry
School of Chemistry and Biochemistry
Georgia Institute of Technology
Atlanta GA 30332-0400

Re: Bersohn Festschrift

Dear Prof. El-Sayed:

I am writing in enthusiastic support of *Journal of Physical Chemistry* Festschrift in honor of Professor Richard Bersohn. Prof. Bersohn, as you know, is a towering figure in the field of photochemistry and reaction dynamics. He is someone whose legacy I find in almost every area we explore in our work, and someone whose current work strongly overlaps my own. I always look to Rich for scientific creativity and vision, as well as wisdom and perspective on the field as a whole. We will be delighted to contribute an original paper contrasting dynamics in $O(^3P)$ vs. $O(^1D)$ reactions with alkanes using velocity map imaging. Please feel free to contact me for any additional information.

Sincerely,

Arthur G. Suits
Associate Professor of Chemistry
