U. S. A.

Dear Prof. El-Sayed,

I would like to contribute a paper to the special Festschrift issue for Prof. Richard Bersohn, as informed by Prof. Neil Shafer-Ray of the University of Oklahoma. I am very much interested in the Festschrift issue.

The general topic of my contribution is "Atmospheric reaction of small molecules studied by a technique of vacuum ultraviolet laser-induced fluorescence spectroscopy". I hope that my contribution meets the high standards of the special Festschrift issue.

Thank you very much for your consideration.

Sincerely yours,
Kenshi TAKAHASHI
