Mostfa A. El-Sayed
Editor-in-Chief
Journal of Physical Chemistry
School of Chemistry and Biochemistry
Georgia Institute of Technology
Atlanta, GA 30332-0400

Dear Prof. El-Sayed,

I am writing this letter to express a heartfelt desire to contribute to a Festschrift issue for Professor Richard Bersohn. He was my supervisor when I spent two years from 1984 to 1986 as a postdoctoral fellow at Columbia University. I am intending to contribute a new work relating to nonlinear laser spectroscopy of ND₃ molecules which reveals dynamics and molecular structures in the excited Rydberg states of this interesting molecule.

Sincerely,

Koichi Tsukiyama
Professor of Chemistry
