Erratum: Analytic Born completion in the calculation of electron-molecule 
differential cross sections

William A. Isaacs and Michael A. Morrison

PACS number(s): 34.80.Bm, 34.80.Gs

Due to an error [1] in Eq. (13) of this paper, several subsequent equations contain errors. The following equations replace those in the original paper:

\[ f_{lm,iqm_0}(k_0;\hat{R}) = \frac{ik_0}{4\pi} \sum_l D^l_{m\Lambda}(\hat{R}) T^\Lambda_{li0} D^{l*}_{m\Lambda}(\hat{R}), \]  

\[ \left( \frac{d\sigma}{d\Omega} (\theta,k_0) \right) = \frac{1}{4k_0^2} \sum_{l_{i0}'} \sum_{l'_{i0}'} \sum_{\Lambda'} \sum l' D_{lll'l'}(\hat{R}) T^\Lambda_{li0} T'^{\Lambda*}_{l'l'i0} P_L(\cos\theta) + \left[ F_0(\theta) \right]^2 + \frac{1}{\pi} \sum_{m=-2}^{2} \left[ F^m_2(\theta) \right]^2 \]  

\[ F^m_2(\theta) = \sqrt{\frac{4\pi}{5}} \left[ \alpha_2 \pi q + \frac{2Q}{3} \right] Y_{2m}(\hat{q}) + \sqrt{4\pi} \sum_{l_{i0}'} \sum_{m} \left[ i^{l_{i0}' - l} (-1)^m (2l+1)^{1/2} (2l_0+1) \begin{pmatrix} l & l_0 & 2 \\ 0 & 0 & -m \end{pmatrix} \right] \times \left[ \alpha_2 M_{l_{i0}'}^l(k_0) + 2QM_{l_{i0}'}^l(k_0) \right] Y_{lm}(\hat{k}), \]  

Note that \( \hat{R} = (\theta,0); \) and for elastic scattering, \( \hat{q} = ((\pi - \theta)/2, \pi) \) and \( q = 2k_0\sin(\theta/2). \)

As the aforementioned error affected only one of the correction terms in Eq. (14), it did not significantly affect the calculations on which the figures in the paper were based or our conclusions about the accuracy of the analytic Born completion procedure.

We gratefully acknowledge Dr. Itikawa for alerting us to this problem. This work was supported by the NSF under Grant No. PHY-9408977.
